ABSTRACT OF THE DISCLOSURE

An object of the present invention is to provide a highly reliable ink jet printer head exhibiting a water-repellent property, low deterioration of ink drop ejection performance, and high friction resistance, along with a method of manufacturing this ink jet printer head. According to the present invention, in the case of an ink jet printer head wherein ink drops are ejected from nozzles formed in a nozzle surface, the ink jet printer head has a metal layer comprising metal formed on the nozzle surface and a self-organized film layer consisting of a polycyclic thiol compound formed on^a top of the metal layer.
